1. Implant is Restored, Now What? Maintenance & Home-Care Challenges Revealed

As dental professionals, we face challenges to assess, maintain and recommend home-care for dental implant patients. This course will reveal answers to the challenges of providing safe, effective implant maintenance, and peri-implantitis treatment. End the confusion with a comprehensive system for assessment, instrumentation, monitoring, and home-care recommendations based on Susan's textbook; Peri-Implant Therapy for the Dental Hygienist: Clinical Guide to Maintenance and Disease Complications.

Educational Objectives:

1. Learn the current research for new protocols, tools, & treatments for peri-implant therapy
2. Review an overview of America College of Prosthodontists (ACP) Guidelines for Recall & Maintenance of Patients with Implant-Borne Dental Restorations & 2018 World Workshop AAP/ EFP Classification and Conditions for Peri-Implant Disease.
3. Put into practice the evidence-based five-step protocol to assess & monitor dental implants.
4. Provide safe implant maintenance & home-care recommendations for all forms of dental implants, their restorations/ prostheses including Full Fixed Arch Hybrids.
5. Gain an understanding of peri-implantitis including cement implantitis complications, prevention, and treatments.

Bio: Susan Wingrove, RDH, BS, dynamic innovator, writer, International speaker, & 2016 Sunstar RDH Award of Distinction recipient. Co-designer of the Wingrove Titanium Implant Set, ACE probes, & Queen of Hearts instruments by PDT, Inc. Scan-Mate by Armor Dental.
